

Ecologically Friendly & Energy Efficient Daylight

NEW

SkyTunnel 

Introducing the

XL²

Sky Tunnel

Introducing clear and comfortable daylight has never been easier. Natural daylight ensures people working or living in these environments are happier and healthier.

By making an environmental choice and utilising this renewable energy, you will be helping to reduce the consumption of our environments precious resources.

Available in 3 sizes, 343mm, 457mm & 535mm diameters there is a size to suit any application. Sky Tunnel™ sizes offer more actual light area than a typical 350mm, 450mm or 550mm Tubular Skylight available on the market.

A little extra light, can go a long way!

The Manufacturers of the Sky Tunnel™ do not compromise on quality, design, materials or structural integrity, adhering strictly to the structural requirements set out by both the British Board of Agrément and the Australian Standards.

Tested by time these skylights are designed to withstand the rigors of use in commercial buildings, and for this reason builders have been using them for over 15 years.

To provide an extra benefit to your decision Sky Tunnel™ comes with a 7 Year Written Manufacturers Warranty!

XL²

The Greener Choice in Skylights!

Why the name XL² ? Two simple XL reasons....

Extra Large - A larger Free Daylight Area means that the diameter you see is the actual throat size of the skylight.

Extra Light - This larger size gives more light!

The "Sky Tunnel XL²" has added a new dimension to Tubular Skylights, and in doing so, has made an already Energy Efficient & Green Product even better for our Environment!

- * **Double Glazed Diffuser as standard**
 - Reducing heat gain in summer & heat loss in winter!
- * **Extra Easy Installation**
 - Saves time, and uses less Energy to Install.
- * **Lead Free Tile Flashings**
 - Allows for the safe collection of rainwater.
- * **Magnetic Diffuser**
 - The Diffuser is held in place with Magnets, much easier to install.
- * **Easy Change Ventilation - Its up to you!**
 - Changeable on the roof and on the ceiling, Ventilation at no charge!
- * **Quality Materials, Quality Workmanship with a Quality Warranty.**
 - 7 Year Written Manufacturers Warranty against defects in manufacturing.
- * **A Size to suit all Applications**
 - Available in three sizes - 343mm, 457mm & 535mm diameters.

Now Available with either Flexi-tube™ or Rigid Tube!

Flexi-tube™

- * Standard in Kits
- * Suits most applications up to 3m in length
- * Easy Installation
- * Highest quality materials
- * 86% Reflection

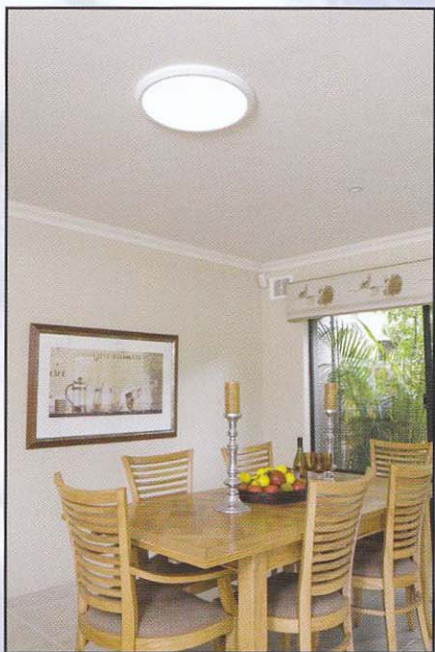

Rigid Tube

- * Available for all 3 sizes
- * Suits special applications incl. over 3m in length
- * 0.5mm Thick Aluminium
- * Special Silver Coating
- * 98% Reflection

SkyTunnel 

Sky Tunnel™ is suitable for any Domestic Application such as Bathrooms, Entrances, Hallways, Stairwells etc

As well as for Commercial Applications such as Reception Areas, Locker Rooms, Gymnasiums, Conference Rooms, Retail Shops or just about any application you can think of!

Sky Tunnel™ is available to suit all roof types!

Sky Tunnel XL²

Same Great Product...
Even better Model!

For over 15 years the Sky Tunnel™ has been delivering Free Natural Light to happy customers all over the world.

And with the New Model, the “XL²” Installation of the product has been made even easier! The unit comes in 3 boxes, Roof Parts, Attic Parts and Ceiling Parts.

The roof parts are fully assembled and ready to go! The dome is already screwed on and the tabs are installed.

The attic parts are also ready to go, the Flexi-tube has already been taped to the Upper Reflective Ring. Twist it onto the roof parts, and your Sky Tunnel™ is ready to go up on the roof!

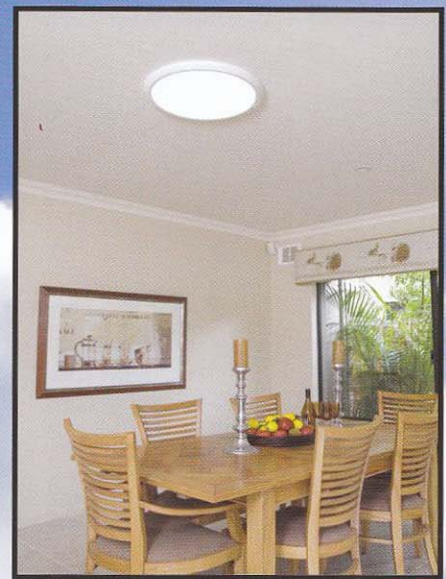

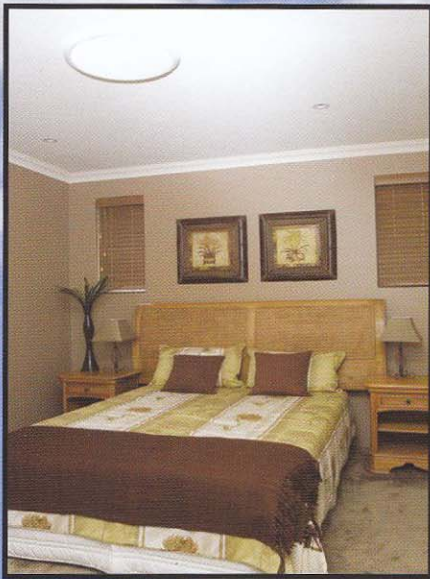

We still offer ventilation at no extra charge if required! And the tabs are easier to change, no need to remove the dome to switch between vented and non vented.

A Double Glazed Diffuser is a standard feature, not an optional extra. This provides a more energy efficient unit in all climates.

This Double Glazed Diffuser is held in place by Magnets sticking to metal plates in the surface of the ceiling frame. The Double Glazed Diffuser also includes a rubber seal, already installed, so no more fiddling with a rubber gasket to seal the unit for maximum energy efficiency.
